Profile

I train deep learning models from scratch at scale on HPC, make them smaller without losing accuracy and deploy them to production. A weight-shared ConvNeXt-T stage trained from scratch on ImageNet-1k removes ~9.6M parameters while staying within 0.6 points of baseline top-1. At Mycrospace, I turned a Master's thesis into a computer vision product tested in five laboratories.

Technical Skills

AI & ML	Object detection, instance segmentation, density estimation, classification, CNNs, ViTs, foundation models, Neural ODEs, PINNs
Training	Python, PyTorch (DDP, AMP, torch.compile), Hugging Face, timm, multi-GPU HPC (SLURM)
Production	ONNX, Docker, GCP (Cloud Run, Cloud SQL, GCS), BullMQ/Redis, CI/CD

Experience

Mycrospace — *Valencia, Spain*

Co-Founder & CTO — *Jan 2024 – Oct 2026*

- CV for microbiology. Master's thesis (2024) → company (Jan 2026); tested in **5 labs**. 1st Prize IdeasUPV (2024).
- **Model.** Own ConvNeXt detector (YOLO/DQ-DETR-inspired), from scratch; 10–2000 colonies/image. **67 mAP50-95**; 92% recall / 93% precision.
- **Training.** **12,500+** GPU-hours on Leonardo (two EuroHPC AI Factory allocations); 4x A100 with DDP/AMP/torch.compile on SLURM and checkpoint-resumed jobs. Own evaluation framework for reproducible, comparable results: k-fold CV and WBF ensembles.
- **Data.** **1,500**/**5,000** images annotated with microbiologists. Weakly-supervised labelling (click → crop → 4-ch CNN heatmap → bbox); versioning + k-fold label scoring.
- **Infra.** Model serving with BullMQ/Redis workers, signed-URL uploads and SSE/WebSocket on GCP (Cloud Run, Cloud SQL, GCS).

MIALAB: Medical Imaging Analysis Laboratory, UPV — *Valencia, Spain*

Research Engineer (full-time) — *May 2025 – Jan 2026*

- Volumetric brain MRI segmentation with nnU-Net; multi-scale feature strategies. Profiled volBrain (**700k+** volumes) from NIfTI ingest to voxel prediction for inference cost.

Vesta-Z — *Valencia, Spain*

Data Engineer — *Jul 2023 – Feb 2025*

- Full-stack cloud features; custom schema for cross-matching items across providers; LLM customer-support bot.

Earlier experience: Tapstar, Full-Stack Engineer (freelance), 2025; Neurocatching, Data Scientist Intern, 2023; Sciling, Backend Developer Intern, 2022.

Education

M.Sc. Artificial Intelligence, Pattern Recognition & Digital Imaging — *Valencia, Spain*

UPV · GPA 8.7/10 · Thesis Honours (became Mycrospace) — *2023 – 2024*

Technology Management — *Valencia / Munich*

CDTM (TUM/LMU) · 16 selected — *2024*

B.Sc. Computer Engineering — *Valencia, Spain*

UPV · GPA 8.3/10 · Honours in ML and Statistics — *2019 – 2023*

Publications

- *Auto-N2N: Self-supervised MRI Denoising using Synthetic Pair Generation and Mixture of Experts.* S. Morell-Ortega et al., incl. **J. Ivars Grimalt**. Preprint, 2026. OpenReview

- *Detecting Cytopathic Effect in Cell Culture with Computer Vision.* W. Ragazzo, **J. Ivars Grimalt**. Under review.

Research

- *Representational Dynamics in Residual Vision Networks.* Manuscript in preparation. jaumeivars.com/research/representation-dynamics. Studies continuous-depth dynamics in ConvNeXt, Swin and ResNet: finer numerical integration without retraining, trajectory geometry and per-block weight corrections. With ~**9.6M** fewer parameters, a weight-shared ConvNeXt-T stage trained from scratch on ImageNet-1k reaches **80.34%** top-1 (baseline: **80.96%**).
